

# Upgrading to IBM Cognos Analytics V11

**Why Upgrade?** IBM Cognos BI 10.X will be out of IBM support come 30<sup>th</sup> April 2018. IBM will not be delivering any more bug fixes.

**IBM Cognos BI  
is changing...  
are you ready?**

## Key new features

- **New interface** – Enabling users to undertake “data discovery” and “traditional BI reporting” in one space.
- **Story telling & visualisation enhancements** – Create rich ‘data stories’ with infographics, more chart types and layouts which help create flow to your reports, thus encouraging understanding and easy digestion of important data.

- **Intent-driven modelling** – New smart technology based on IBM Watson technology allowing you to use natural language to search for answers.
- **Data discovery** – Enhanced data modules and dash boarding.
- **Dashboard creation** – Drag and drop data to suit your reporting and analysis needs.
- **Mobile access & authoring** – Allowing you to view and author on the go.
- **Upload data files** – Store data from delimited text and Excel files on the file system rather than in-memory or in an RDBMS.
- **Out-the-box geospatial mapping** – Powerful geospatial mapping is ready to go, out of the box.
- **Alerts & subscriptions** – Subscribe to, create alerts for and access your reports in 'My Subscriptions'.
- Designed for faster performance and efficiency.
- Roll out to new user groups with minimal effort and training.

## How can HAYNE help you?

- **Technical installation**
- **Upgrade planning and scoping**
- **Customisation of Cognos Analytics 11**
- **Support and issue resolution during migration**
- **Assistance with testing**
- **Training on Cognos Analytics 11**
- **Moving to a cloud solution**
