

A reporting tool for IBM Cognos Controller

IBM Cognos Controller includes Financial Analytics Publisher (FAP) running on Planning Analytics.

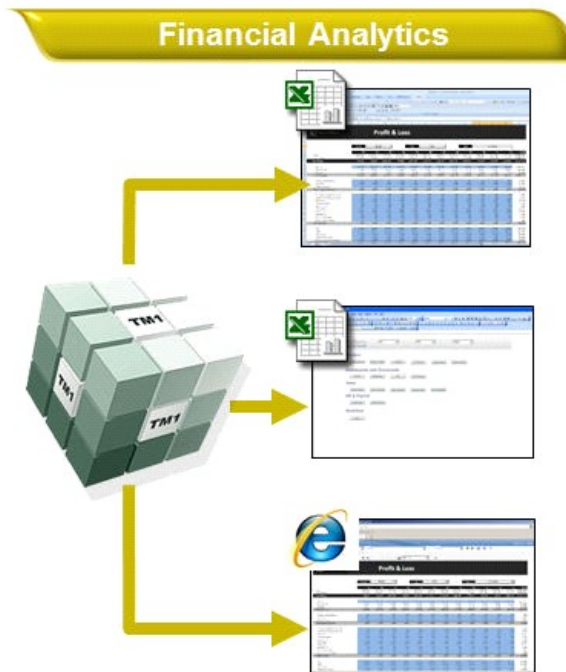

HAYNE Analytics filters the FAP cube and adds finance functionality. Designed and developed by HAYNE, approved and validated by IBM.

Pre-configured TM1 cubes provide a platform for easy integration with Excel, Business Intelligence and Disclosure Management reporting.

Key Points

- **Focused and user-friendly** role-based reporting cubes
- **Pre-built** with around 90% of financial reporting requirements out-of-the-box
- **Bespoke design** enabled with a toolbox of TI processes and rules
- **Configured connections** to BI and Disclosure Management
- **In-built functionality** – KPIs, intercompany cube, weekly reporting
- **Intercompany reporting cube** allows drill-down and easy reporting on balances in a matrix view

30 times faster than reporting on relational datasources

HAYNE Analytics cubes:

- **Company Reporting**
- **Group Reporting**
- **Intercompany Reporting**
- **Weekly Reporting**
- **KPIs**

Speed up your Excel reporting. Add slide, dice and drilldown capabilities to add insight into your financial reporting.

Available as Cloud-priced or a one-off (on premise) priced solution.
