

Licence compliance management tool for IBM Cognos Controller

Avoid a fine – take the guesswork out of licence management

Take the risk out of keeping track of your IBM Cognos Controller licences and differentiating Admin and Standard users, thereby helping to avoid the potential hefty compliance penalties from IBM if you get it wrong.

This tool has been designed by our talented in-house developers with the end user in mind. It can be installed remotely within a day and will require minimal downtime.

Whilst we are confident that it is intuitive to use, if you need any assistance in system testing we will be happy to provide the relevant consultancy if so desired.

Key Points

- Built for IBM Cognos Controller with an intuitive web front end
- Remote installation
- Easy to use, no training required
